FEATURES/ TECHNICAL SPECIFICATIONS

SCREEN SPEED - 400 MHZ

DEVICE DEPTH -
1200 MTRS

3 YEARS
WARRANTY

PROCESSOR SPEED - 40MHZ

FRONT RANGE -
250/500/ 750/1000
MTRS

1 YEAR
GUARANTEE

FREQUENCY - 40 MHZ

24*7 SERVICE

SCREEN QUALITY - 128*64

LI/ION - INPUT 100-250V

BATTERY - 7.4V/ 1400 MAH

BATTERY CHARGE - 1 HOUR

BATTERY BACKUP - 12 HRS

POOL FINDER

LONG RANGE WATER DETECTOR

ZEODETECT POOL FINDER Long range device is the best modern German Technology to afford the power and ease of use and its small size and accuracy of the results. The device has been tested by processors to prove the quality of their industry before put it on the market. You can choose the required range by adjusting the extent by the control key the choices for the range of the device (250 meters) or (500 meters) or (750 meters) or (1000 meters) perpendicular. After the completion of settings and start the process of detecting the device will start to send and receive special frequencies to detect. The type that you will choose it from the list, up to 1200 meters under the ground. When the device receives signal it will follow the signal automatically toward the target and when it turns towards the target referred to by the sender and the receiver antenna of the signal and when you will be above the target center the device will wrap in a circular motion above the target directory.

FEATURES/ TECHNICAL SPECIFICATIONS

SCREEN SPEED - 400 MHZ

PROCESSOR SPEED - 40MHZ

FREQUENCY - 40 MHZ

SCREEN QUALITY - 128*64

LI / ION - INPUT 100-260V

BATTERY - 7.4V/1400MAH

BATTERY CHARGE- 1 HOUR

BATTERY BACKUP - 12 HRS

DEVICE DEPTH -
1200 MTRS

FRONT RANGE -
500/1000/ 1500/2000
MTRS

WATER TYPE -
SALT/ NATURAL

POOL FINDER PLUS

LONG RANGE WATER DETECTOR

ZEODETECT POOL FINDER PLUS Long range device is the best modern German Techonolgy to afford the power and ease of use and its small size and accuracy of the results The device has been tested it by processors to prove the quality of their industry before put it on the market. You can choose the required range by adjusting the extent by the control key the choices for the range of the device (500 meters) or [1000 meters) or (1500 meters) or (2000 meters) perpendicular. After the completion of settings and start the process of detecting the device will start to send and receive special frequencies to detect. The type that you will choose it from the list, up to 1200 meters under the ground. When the device receive signal it will follows the signal automatically toward the target and when it tum towards the target referred to by the sender and the receiver antenna of the signal, and When you will be above the target Center the device will wrap in a circular motion above the target directory.

FEATURES/ TECHNICAL SPECIFICATIONS

PROCESSOR SPEED - 40MHZ

FREQUENCY - 40 MHZ

LI / ION - INPUT 100-250V

BATTERY 8.4V

BATTERY CHARGE- 1 HOUR

BATTERY BACKUP - 10 DAYS

DEVICE DEPTH -
200M/300M/500M/
900M

FRONT RANGE -
500M/1000M/1500M/2
000MTRS

WATER TYPE -
Natural ,Fresh or Salt
water

3YEARS
WARRANTY

1 YEAR
GUARANTEE

24*7 SERVICE

POOL FINDER PLUS RG PRO

LONG RANGE REPORT GENERATION SYSTEM

ZEODETECT POOL FINDER PLUS RG PRO Long range device is the best modern German Technology to afford the power and ease of use and its small size and accuracy of the results The device has been tested it by processors to prove the quality of their industry before put it on the market. Download and install the App & Connect the Device to app. You can choose the required range by adjusting through the App. As per your requirement choose Like Range,Depth,Type Of Water. After the completion of settings and start the process of detecting the device will start to send and receive special frequencies to detect. The type that you will choose it from the list, up to 1200 meters under the ground When the device receive signal it wil follows the signal automatically toward the target and when it turn towards the forget referred to by the sender and the receiver antenna of the signal and When you wil be above the target Center the device will wrap in a circular motion above the target directory.

GROUND SCAN- 300

WITH REPORT GENERATED SYSTEM

GROUND SCAN-300.300M automatic mapping water detector is based on the Earth's electromagnetic field as the field source, based on the difference in the conductivity of different underground geological structures, and by studying the variation law of the electric field components at different frequencies to study the geological structure and changes to find groundwater resources by scientific method. Changes in geological structure are displayed in real-time through multiple curves. Automatic form mapping geological profile by one key operate easily get rid of complicated computer graphics The site can quickly understand the geological structure through the automatic mapping curve and profile, and analyze specific information such as aquifers, fractures, faults, and caves. The instrument is widely used in the rapid analysis of geological structure changes in different terrains such as plains, hills, mountains, plateaus, and basins to determine well locations, aquifers, and aquifer depth.

FEATURES/ TECHNICAL SPECIFICATIONS

1. Be suitable for plain, hill, mountain land, highland, basin all kinds of geologic structure application.

2. Automatic mapping in the instrument, got drilling position and depth result of site.

3. Professional user group offers 24 hours after sale service.

4. The average accuracy of more than 95% from user's feedback.

5. It is widely used for drinking water, agricultural irrigation water detection.

6. It's easy to operate, Non-professional can learn the operation.

7. Only 1-2 people can operate

8. One year Guarantee and three years warranty

9. Selected the depth according to your demand, 100/150/300 Meters

Model - Ground Scan-300

Depth - 100/150/300 Meters

Frequency - 36/40 Frequency

System - ZEO DETECT

LCD - HD touch screen

Units of Measurement - AVs(MV)

Measurement Range - 0mV-1500mV

Stand-by Time - 8-10 hours

Power Supply -
Battery Model #26650: 3.7V
5000mAh Rechargeable lithium battery

3 YEARS
WARRANTY

1 YEAR
GUARANTEE

24*7 SERVICE

GROUND SCAN- 500

WITH REPORT GENERATED SYSTEM

GROUND SCAN-500.500M automatic mapping water detector is based on the Earth's electromagnetic field as the field source, based on the difference in the conductivity of different underground geological structures, and by studying the variation law of the electric field components at different frequencies to study the geological structure and changes, to find groundwater resources by scientific method. Changes in geological structure are displayed in real-time through multiple curves. Automatic form mapping geological profile by one key operate easily, get rid of complicated computer graphics. The site can quickly understand the geological structure through the automatic mapping curve and profile, and analyze specific information such as aquifers, fractures, faults, and caves.
